Quarterly Market Review  
Second Quarter 2015

## The Markets

Oh, the uncertainty!

Investors are keeping one eye on the Federal Reserve and the other on politicians trying to determine what may happen during the last quarter of the year.

The Fed, which is the central bank of the United States, is responsible for conducting monetary policy with an eye toward full employment and stable prices. If, as St. Louis Fed President James Bullard told Reuters, the economy is near full employment and inflation is sure to rise, then why didn't the Fed raise rates in September?

Reuters reported voting members of the Federal Open Market Committee (FOMC) decided uncertainty in global markets had the potential to negatively affect domestic economic strength.

vehicle communication (V2V) has been tested in Ann Arbor, Michigan, a relatively mild and polite Midwestern town. Now, V2V is being rolled out in New York City, along with technology that allows traffic signals to contribute their two cents. Just imagine what a New York cab might have to say to another New York cab that changes lanes without signaling.

Okay, it's nothing like that.

The idea is to reduce traffic accidents. If a dangerous situation arises an alert sounds. Gizmodo.com described it like this:

"These sensors send out signals over a specific wireless spectrum band and also receive them from other vehicles, creating a network of communicating sensors that ping when there's danger... A secondary form of the technology, called Vehicle-to-Infrastructure, does the same thing - but with sensors embedded in stop signs, traffic lights, and other pieces of road infrastructure."

## Best Autumn Activities in San Diego

Autumn is a great time in San Diego for locals to get out and do fun stuff. The summer heat and tourist crowds are all but gone, and the crisp, cooler weather brings a nice feeling, knowing the holidays are around the corner. We may not have a distinctive seasonal change as other parts of the country, but the weather makes for nifty outings and activities. To me, it's the best time to go out and enjoy San Diego. Here are my Top Picks for Autumn

Activities.

### **Head to Julian**

If you want to get a taste of autumn, there's no better place than to head to the mountain town of Julian. Breathe in the cool mountain air, take in the quaint town shops, see the leaves changing colors, eat some famous apple pie - it's only a 90-minute drive. Some of the surrounding local orchards will even let you pick your own apples, when in season. A trip to Julian will put you in the proper autumn mood.
